One of the best of the Rossetti stories concerns Mr. Whistler. Once Rossetti asked Whistler how he liked a sketch he had made for a picture. "It has good points," was the answer. "Go ahead with it." A few weeks later he was asked about the picture. "Doing fa-mously," said Rossetti. "I've ordered a stunning frame for it." Some time later Mr. Whistler saw the canvas, setti, "but I've written a sonnet on the subject; if you would care to hear it."

When the recitation was over, Mr. Whistler said, "Rosetti, take out the canvas and put the sonnet in the frame.'

UNITED STATES ARMY.

Will Leave the Clothing Used Here Distinctive.

By changes in the uniforming of the United States Army the uni- RIPLEY & REYNOLDS, forms of the National Guard of Hawaii will become distinctive. At present a soldier of this country is PACIFIC HARDWARE CO. dressed and equipped exactly as a soldier in the States.

The Board of Army Officers at w w wRIGHT, Fort St., opposite Club Statles Washington has decided on a number of changes in the uniforms for the officers of the army, and the Secretary of war has approved. The change seems unpopular. Colonel Graham said: "I can

readily appreciate the reasons for the officers objecting to the change. It necessitates the expenditure of money for new uniforms before they are needed, and the officers loose the use of that money for many months. Of course, the J. HOPP & CO. money is not lost to them because they can wear the old uniforms unrilla and it made me feel so much betier that I continued taking it and have taken six bottles. It has done wonders for me, as I have not been so free from my old pains and troubles since the soften from my old pains and troubles since the light to occur before the new suits liable to occur before the new suits Hood's Sarsalla Cures
war. I consider Hood's Sarsaparilla a God-sent
blessing to the suffering." WILLIAM J. BAKER

mill of the Paabau Plantation

PAAURAU PLANTATION CO.,
HAMAKUA, Jan. 19, 1815.
WM. G. JIRWIN & CO., LTD., HONOLULU:
GRETLEREN—The mill has been running during the past two weeks, with the National Caue Shredder lately installed, giving the most satisfactory results.
Our mill consists of three sets of two rollers, 32 in. dia. by 72 in. long, driven by an automatic engine 11 in. dia. cylinder by 14 in. stroke.
The Rattoon cane being milled is as hard as it is possible for came to be, having been subjected to a severe drought during the whole period of its growth, and growing on land with a trade wind exposure. Our experience with the Shredder, particularly with above came, proves it to be just what our mills required, the shredder came being better prepared to have its juice extracted than formerly after passing through the first mill. The first mill is now allowed to open 9-16 in. instead of 15 in. as formerly, so that the trash now leaves the first mill, better ground, than it formerly did the second, and this without the old timed groming, choking, and straining of the machinery.

Behind the first and second mills we apply hot water, the quantity for the past 12 days, as per statement attached, has averaged 35 per cent. on the total juice from the came.

The trash from the last mill is cut up much finer than before the Shredder was applied, on the of it resembling saw dust, it contains as per statement attached, has averaged 35 per cent. on the total juice from the came.

The trash from the last mill is cut up much finer than before the Shredder was applied, on the other make steam much easier than before, now care has to be taken to keep them from blowing off, whereas before great care twas necessary to keep the steam from going too low when the Pan was on.

By the use of the Shredder we have dispensed with six men, formerly necessary to distribute the came on the carrier, feed the first mill, and throw back the long pieces.

The Shredder Machinery is a good substantial jou, and should cause little or no trouble, as it is subjected to but

following advantages:

THE CRUSHER will cut the cane transversely in pieces about 3 inches long and extract about 30 per cent, of the juice and pieliver the crushed cane in a uniform layer to the 3 roller mill, thereby causing a perfect feed and increased extraction of juice.

THE CRUSHER will leave the "skin" on the cane, thereby giving the juice a better chance to be expelled than if the cane was ripped open subjecting the pulp to the hard packing on the returner bar of the 3 roller mill.

THE CRUSHER will save labor in handling of the cane, as an irregular distribution of care on the carrier will not materially effect the regular and even freed to the 3 roller mill.

THE CRUSHER will not require additional steam or boiler power, as it has

TESTIMONIALS:

TESTIMONIALS

Pepeekee March 28, 1895.
Messrs Honefulu from Works Co.—Pean Sins: We have used the Crusher since the beginning of the season and have had no trouble or hitch whatever with it or the engine.

The Crusher is extracting 40 per cent. to 50 per cent, of the jince beside cutting the case in pieces five to six inches long and giving a perfect, even and steady feed to the three roller milt. We are doing 20 to 25 per cent more work per day and could do much more if our bolling house capacity would permit. We are saving the labor of six men on the cane carrier every stay.

Kexaga Plantation, March 22, 1895.

I remain, yours respectfully.
